Experience

Integra Technologies – Component Lab Analyst | Wichita, KS

March 2023 – Present

- Conducting thorough analysis and evaluation of semiconductor components to ensure compliance with industry standards and specifications
- Managing workflow of device analysis jobs to ensure systematic, logical, and detailed examination of devices at various states of disassembly
- Analyzing process outputs for anomalies and failures to determine if devices have defects that could impact reliability for future system performances and development
- Ensuring electronic components quality and reliability through rigorous testing and analysis
- Experience in utilizing advanced tools such as SEM (Scanning Electron Microscopy), X-rays analysis, and material testing to conduct in-depth failure investigations, contributing to enhancement of product reliability and performance
- Handling various chemicals for de-encapsulation process, ensuring integrity and reliability of semiconductor components while staying up to date with OSHA/EPA/DOT policies
- Collaborate with report writers to ensure accurate and precise reports, providing crucial data and support to prominent Aerospace and Defense companies
- Collaborate with engineering and management team to identify and resolve component-related issues, improving product quality and reliability

CSL Plasma | Wichita, KS

September 2021 – October 2023

Senior Phlebotomist (December 2022-October 2023)

- Ensured 5-10 phlebotomists and donor support technicians are in compliance with standard operating procedures
- Participated in monthly meetings to discuss training, errors, and solutions for major issues or concerns
- Identified and resolved challenges that arise with internal staff and donors through effective problem-solving and troubleshooting techniques, ensuring uninterrupted workflow and work environment
- Communicated with others to coordinate timed breaks to ensure efficient production time
- Provided guidance and technical training about processes to staff on the floor and other areas required
- Troubleshoot equipment failures and create incident documentation necessary for equipment removal

Phlebotomist (January 2022-December 2022)

- Evaluated veins before donors donate to identify possible problems that can occur during donation process
- Collected blood samples from donors for lab testing
- Ensured donation process is efficient and make adjustments when necessary for positive experience
- Made necessary corrections in order to expedite donation time and ensure product quality and donor safety

Donor Support Technician (September 2021-December 2021)

- Prepared and monitored donors, donor area, and equipment for donation process
- Monitored and responded to specific alarms, signals, or alerts that may occur during the process
- Disconnected donors when the process is complete and maintain clean efficient work environment

Sweet Pops – Floor Lead | Wichita, KS

October 2020 – September 2021

- Demonstrated ability to oversee day-to-day operations, including inventory management, assisted in staff scheduling, and ensuring exceptional customer service at a high-volume drink shop
- Skilled in team leadership and training, optimizing workflows, and maintaining a positive work environment, resulting in increased efficiency and staff retention

Achievements

Component Lab Analyst

- Contributed in creating Failure Mode and Effects Analysis (FMEA) and training documents for the Radiflo Mark VI Leak Detection (Krypton-85)

- Assist in researching solutions for safety upgrades in working environments that deals with different chemicals

Senior Phlebotomist

- Assisted in training and educating internal staff on advanced venipuncture procedures, safety protocols, and adherence of quality control measures, resulting in enhanced team competency and improved donor experience
- Consistently achieving over 1,000 successful blood draws per month, surpassing performance benchmarks in comparison to peers.

Floor Lead

- Collaborated with management team to strategize and contribute to the decision-making process for opening a second location, demonstrating effective decision-making skills and a proactive approach.
- Implemented initiatives that significantly boosted sales numbers, showcasing a strong impact on business growth

Education

Certificate, KU Full-Stack Coding Bootcamp | September 2023 – March 2024

- Technical: HTML, CSS, JavaScript, Github, Git, MySQL, noSQL, Node.js, React.js, Express.js, MongoDB, Git, GitHub

Degree, Bachelor of Science in Health Science and Psychology | August 2018 – May 2022

Minor in Health Management, Minor in Public Health

- Magna Cum Laude // Wichita State University // Wichita, KS
- GPA: 3.864

Special Awards

- College of Health Science Dean's Honor Roll // August 2018 – May 2022
- Heritage Merit Scholarship // August 2018 – May 2020
- Freshmen Merit Scholarship // August 2018 – May 2019

Certifications

- Radiological Safety for Radiflo System Operation: Cognizant Engineer, Operator Trainer
- OSHA HAZWOPER Training
- Safety Chemical Handling Training

Skills & Interests

- Proficient in analyzing different standards including, but not limited to:
 - MIL-STD-883
 - MIL-STD-750
 - MIL-STD-1580
- Proficient in component analysis techniques/tools such as:
 - X-Ray
 - Scanning electron microscope (SEM) and X-Ray Fluorescence (XRF)
 - Energy Dispersive Spectroscopy (EDS)
 - Cross section/inspection
 - Laser Ablation
 - Optical Microscopy (External/Internal)
 - Particle Impact Noise Detection (PIND)
 - Chemical Decapsulation
 - Destructive Bond Pull testing
- Detail-oriented with a focus on accuracy in analysis and documentation
- Quality control practices to ensure high-quality data
- Clear and concise communication within team collaborations
- Analytical and problem-solving skills for identifying and resolving component-related issues
- Languages: English and Vietnamese
- Interests: Dancing, reading, lifting, playing video games, building keyboards and PCs
